

# Your calendar of jobs to do all year round

Our pick of seasonal tasks for developers, land managers and homeowners

Spring	Summer	Autumn	Winter
← Bird nesting season →			
← Monitor for tree pests and disease →			
Ideally leave trees and hedges alone!	Mulch around trees to suppress weeds and maintain moisture	Rake up and burn any diseased leaf litter	Clear JK canes and burn on-site
Spray ragwort, giant hogweed and docks at rosette stage	Spray Japanese Knotweed in full leaf	Visual check of tree stock/condition	Organise any necessary tree surgery
Survey for great crested newts on development sites	Carry out bat surveys on development sites	Start hedge cutting/laying	Plant trees and prune (most) fruit trees
Organise Phase One Habitat Survey on development sites	Pull Himalayan Balsam up late summer before it sets seed	Create garden habitats for hibernating wildlife	Repair stiles, signs and paths
Stack logs ready for next winter	Organise invasive species audit for your plot of land	Add fallen leaves to compost	Put up bird boxes ready for spring
		Check for fungi growth on trees	Leave out food and water for wildlife
